

Oil Analysis - Do You Understand What Your Engine is Telling You?

Wayne Odegard, AvLab Corporate Accounts Manager, and other members of the AvLab team will discuss how oil and oil filter analysis is done. This approximately 90 minute presentation will cover what is important when considering this kind of analysis program, and how the data can help determine premature engine wear. Real examples will be presented where oil and/or filter analysis has saved money and, potentially, lives.

Directions: West Houston Airport is located north of I-10 between Hwy 6 and Barker Cypress Road.
